## VELTLÍNSKE ZELENÉ

Veltlínske zelené is a quality varietal very popular dry wine. In wine-growing areas this typical harmonious wine is dominant in popularity among other varieties. It is full of extractive wine of southern character in which tropical fruit is very resonant. The yellow-green colour of the deeper hue indicates the quality of Veltlínske zelené.

It offers us a wide spectrum of fruit aromas. It has a characteristic almond bouquet, sometimes dominated by honey tone enriched by a scent of green apples and spicy lime.

Delicious taste of green fruits and honey, with peeled almonds and fruity aftertaste is supported by fresh acids. Higher acid content and significant dryness goes well with this wine.

Recommended temperature is 11–13 °C.
