

SUNNBERG

FRANKOVKA

Frankovka is a lighter less vivid red wine. Red colour can reach fiery dark ruby tones. The aroma is dominated by cinnamon and ripe cherries, completed by mysterious smoky undertones together with drupe or walnuts. The fragrance of the best vintages also includes beautiful sweet scent of ripe raspberries or blackberries. The typical taste of Frankovka is pleasantly harsh and spicy, enriched with subtle smoky tones, leaves long lasting and strong aftertaste on your palate. We can also find cinnamon flavour or dark chocolate. Young wines tend to be hard, underlined by bitterness of tannins and higher acidity. The wine quality increases proportionally to the ripening temperature of the grapes. As it matures, it loses its hardness and develops in breadth, fullness and depth. Loss of hardness symbolizes the end of maturation. This wine is suitable for barrique barrels and for aging in a bottle. Recommended temperature is 15–17 °C.
